Work experience

Full-Stack Software Developer
DennoKotsu,Inc; Delivering a cloud call/dispatch system to taxi companies.
April 2020 - April 2023   Tokushima, Japan

- Created new taxi experience by complex fare calculation of each company and determining the fare before calling a taxi.
- Increased service stability by implementing a call center function using Vonage API to build redundant configurations with an existing call center function using Twilio API.
- Reduced development and operating costs use for demonstration experiments by one-tenth by integrating apps on a single server, and using multiple domains on it.
- Improved Nginx log collection performance by reducing the total number of query calls between AWS Lambda and OpenSearch and excluding unnecessary logs.
- **Leveraged knowledge** in Git, programmed in Ruby(Rails), Javascript, Typescript, ReactJS, and debugged using Linux commands(tail, less, grep), Chrome Developer Tools.
